

Figure 1. Percentage of suppressed viral load values over time among persons living with HIV in clinical care across the US in the CNICS cohort, 1997-2015

Panelists

Heidi Crane is a Professor of Medicine at the University of Washington and is Associate Director of the UW Center for AIDS Research Clinical Cohort and Comorbidity Research Core. She and her colleagues have developed the clinical assessment of patient reported measures including adherence that has been implemented into clinical care at sites across the US participating in the CNICS network.

- Steve Safren is a Professor of Psychology at University of Miami, where he has been for the past year and a half, and is co-Director of their Social/Behavioral Sciences Core for the CFAR. He has developed and tested adherence interventions for ART that involve integrating treating depression and other mental health / substance use problems in the context of HIV infection.
- Ira Wilson is a Professor and Chair of the Department of Health Services, Policy & Practice at the Brown University. He is also a primary care physician who sees patients at the VA Hospital in Providence, RI.
