

OCTOBER 13-15, 2024

EXHIBITOR AND SPONSORSHIP PROSPECTUS

FAST-TRACK CITIES 2024

ABOUT THE CONFERENCE

Fast-Track Cities 2024 will be the fifth international conference convening more than 550 cities that are accelerating their responses to HIV, tuberculosis, and viral hepatitis. The conference will take place at the Maison de la Mutualité in Paris.

Fast-Track Cities 2024 is organized by the International Association of Providers of AIDS Care (IAPAC), in collaboration with the Joint United Nations Programme on HIV/AIDS (UNAIDS), Fast-Track Cities Institute, Stop TB Partnership, and the Coalition for Global Hepatitis Elimination.

WHO ATTENDS

Delegates will include elected officials, public health department representatives, clinical/public health researchers, healthcare payors, donors/grantors, clinicians, service providers, and civil society advocates from current and prospective Fast-Track Cities.

WORKSHOP PROGRAMMING

The conference's aim is to share best practices in accelerating urban health responses, and explore opportunities to leverage the network to support integrated health responses. The conference program will comprise a combination of plenary sessions, panel discussions, and oral and e-poster abstract sessions. In addition, the conference will provide a space for collaborative development of innovative approaches to achieve optimal health outcomes in urban settings through thematic skills-building workshops and affiliated satellite symposia.

Cities play a critical role in the HIV epidemic's response. More than half of the world's population currently live in cities, and in most countries, cities account for a large and growing proportion of the national HIV burden.

City dynamics and networks can also contribute to an increased risk of HIV transmission in cities. On the other hand, cities offer advantages and important opportunities for programming, effective action and innovations to end AIDS.

Fast-Track Cities is a global partnership between cities and municipalities around the world.

Eight years since the launch of the Fast-Track Cities network, more than 500 cities and municipalities have signed the *Paris Declaration on Fast-Track Cities*, committing to accelerate their local responses to attain HIV and TB programmatic targets, as well as zero stigma. Since July 2018, Fast-Track Cities are also working towards HBV and HCV elimination.

Advanced collaboratively with local stakeholders, intervention areas include data generation/monitoring, implementation planning, capacity-building, community engagement, stigma elimination, and quality of care and life assessments.
