## Community-Driven: Facilitating Long-Term Engagement in HIV Care

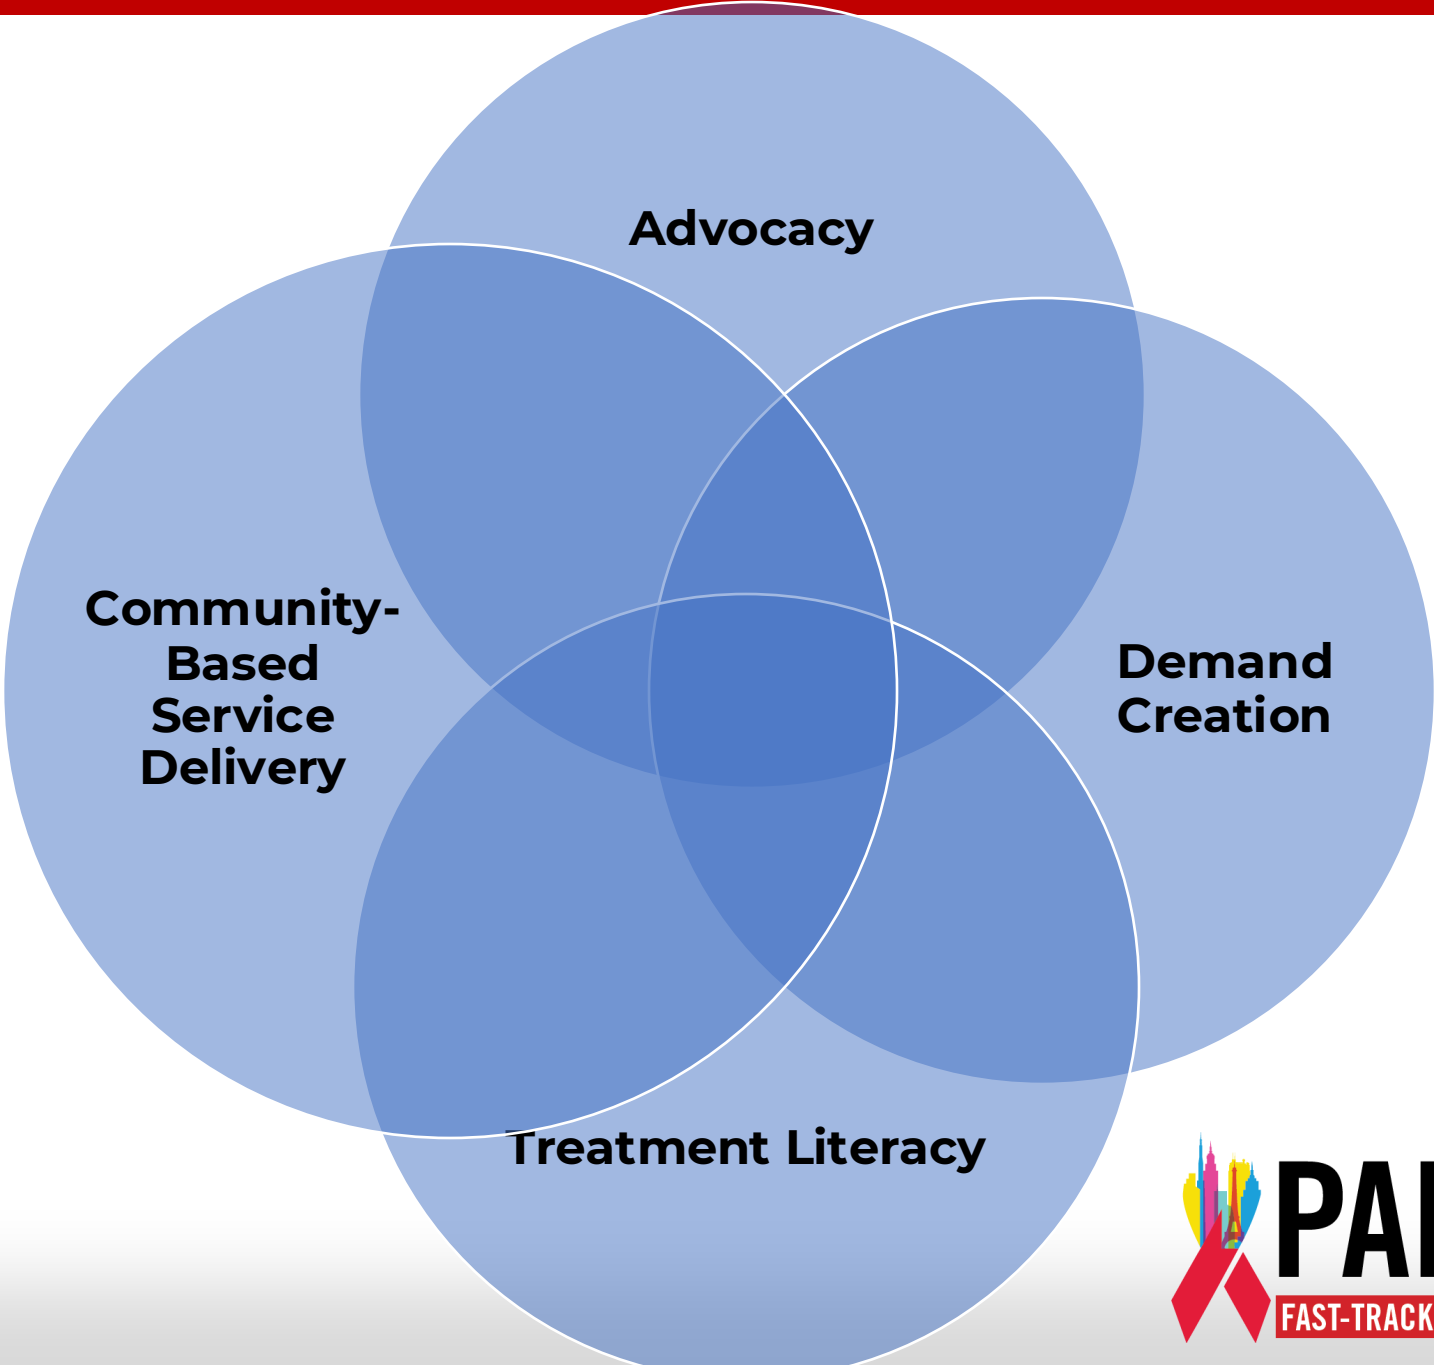

**Florence Riako Anam, GNP+**

# Who are we speaking about and why?

**Approaches  
led by  
communities**

# Successes and wins

**9.3 million**

people still need lifesaving HIV  
treatment

**120K children**

acquired HIV in 2023, adding  
to the global total of children  
living with HIV.

# Unfinished business

**36%**

**adolescents**

aged 15-19 with HIV (370,000) not  
receiving antiretroviral therapy in  
2023

# Opportunities for sustainability

**Integrated, HIV  
and other health  
services**

**Community Led  
interventions**

**HIV Prevention  
Options for all  
including KP**

**Partnerships**

**Intentional on  
closing gaps**

**Full  
implementation of  
policies protecting  
ALL People**

**Retentions to care**

To **prevent** the 630,000 AIDS-related deaths seen in 2023, we must urgently **close gaps** in **HIV testing and treatment**. Rapid action can **reduce deaths to below 250,000** by 2025.

**Thank you :)**
